Hello Google Developer,

In accordance with OAuth 2.0 Policies, the following projects that you manage have OAuth clients that have been inactive for at least 5 months. Inactive clients will be deleted in 30 days unless you take action. Active clients in these projects won't be affected.

Here is the list of projects with inactive clients:

- gen-lang-client-0457749334

Visit the Google Cloud Console to see the complete list of inactive clients.

To prevent inactive OAuth clients from being deleted, use them in a Sign-in with Google flow or to exchange a refresh token for an access token. Do this for each client that you want to retain.

If you no longer need these OAuth clients, no additional action is required, and they will be automatically deleted for you. Once OAuth clients are deleted, you will have up to 30 days to restore them by visiting the Google Cloud Console.

Thank you for using the Google Auth Platform!
