DataCamp is sharing 600+ Courses for free this week. But here's the caveat you need to know and exploit smartly.

VEERAJ KANTILAL GADDA
JUN 3

READ IN APP

Data Camp is sharing 600+ Courses until June 7. However, here's the caveat. After June 7, these courses become paid. So, you may start any course but after June 7, it will be paywalled again. So, I did three things for you'll :

1. Courses you can easily finish by June 7 for any career track.
2. Course you can continue to pursue on Data Camp if you like it.
3. Free Certifications you can pursue from elsewhere.

Grad Tech Roles to Apply : Link

Courses you can easily finish in under 10 hours.

AI Engineer (~10 hrs)

- Understanding Artificial Intelligence — 2 hrs
- Large Language Models (LLMs) Concepts — 2 hrs
- Understanding Prompt Engineering — 2 hrs
- Working with the OpenAI API — 3 hrs

This completes the AI Fundamentals skill track and earns a track certificate.

Data Engineer (~8 hrs)

- Understanding Data Engineering — 2 hrs
- Data Warehousing Concepts — 2 hrs
- Introduction to Snowflake — 4 hrs

Data Scientist (~10 hrs)

- Introduction to Python — 4 hrs
- Introduction to Statistics in Python — 3 hrs
- Supervised Learning with scikit-learn — 4 hrs

Software Developer (~9 hrs)

- Introduction to Python for Developers — 3 hrs
- Introduction to APIs in Python — 3 hrs
- Introduction to Docker — 3 hrs

Business Analyst (~10 hrs)

- Data-Driven Decision Making for Business — 2 hrs
- Introduction to Power BI — 4 hrs

- Introduction to SQL — 2 hrs
- Data Communication Concepts — 2 hrs

Data Analyst (~10 hrs)

- Introduction to SQL — 2 hrs
- Intermediate SQL — 4 hrs
- Joining Data in SQL — 4 hrs

If you really like Data Camp and want to invest and continue , you can pursue the below courses.

1. AI Engineer

Enroll in this career track: Associate AI Engineer for Developers (26 hrs), or Associate AI Engineer for Data Scientists if you already have a data background.

The courses to do:

- Understanding Artificial Intelligence (beginner — start here)
- Generative AI Concepts (beginner)
- Large Language Models (LLMs) Concepts (beginner)
- Understanding Prompt Engineering (beginner)
- Working with the OpenAI API (intermediate)
- Introduction to Deep Learning with PyTorch (intermediate)
- Introduction to Claude Models (beginner)
- Introduction to LLMs in Python (advanced)
- Developing LLM Applications with LangChain (advanced)
- Developing AI Systems with the OpenAI API (advanced)
- Introduction to MLflow (advanced)
- Monitoring Machine Learning in Python (advanced)
- AI Engineering with LangChain

- AI Fundamentals

2. Data Engineer

Enroll in this career track: Data Engineer in Python, or Associate Data Engineer in Snowflake.

The courses to do:

- Understanding Data Engineering (beginner — start here)
- Introduction to Data Engineering (intermediate)
- Database Design (intermediate)
- Data Warehousing Concepts (beginner)
- Introduction to Apache Airflow in Python (advanced)
- Introduction to dbt (advanced)
- Intermediate dbt (advanced)
- Introduction to Snowflake (beginner)
- Big Data Fundamentals with PySpark (advanced)
- Introduction to NoSQL (intermediate)
- Streaming Data with AWS Kinesis and Lambda (advanced)
- Introduction to Databricks (beginner)
- Associate Data Engineer in Databricks (intermediate)
- Snowflake Foundations
- Data Engineer

3. Data Scientist

Enroll in this career track: Associate Data Scientist in Python, then layer on Machine Learning Scientist with Python.

The courses to do:

- Introduction to Python (beginner — start here)
- Cleaning Data in Python (intermediate)
- Introduction to Statistics in Python (intermediate)
- Exploratory Data Analysis in Python (intermediate)
- Supervised Learning with scikit-learn (intermediate)
- Unsupervised Learning in Python (intermediate)
- Machine Learning with Tree-Based Models in Python (intermediate)
- Sampling in Python (intermediate)
- A/B Testing in Python (intermediate)
- Natural Language Processing with spaCy (intermediate)
- Machine Learning for Time Series Data in Python (advanced)
- Deep Learning for Images with PyTorch (advanced)
- Reinforcement Learning with Gymnasium in Python (advanced)
- Machine Learning Fundamentals with Python
- Data Scientist

4. Software Developer

Enroll in this career track: Python Developer, with Associate AI Engineer for Developers

The courses to do:

- Introduction to Python for Developers (beginner — start here)
- Software Engineering Principles in Python (intermediate)
- Python Toolbox (intermediate)
- Intermediate Object-Oriented Programming in Python (advanced)
- Introduction to Testing in Python (intermediate)
- Introduction to APIs in Python (intermediate)
- Introduction to Docker (intermediate)

- Developing AI Systems with the OpenAI API (advanced)
- Claude Code 101 (beginner)
- Software Development with Claude Code (intermediate)
- Introduction to Java (beginner)
- Introduction to Object-Oriented Programming in Java (intermediate)
- Python Programming Toolbox
- Azure Fundamentals (AZ-900) — a solid, recognized credential to pair with developer skills.

5. Business Analyst

Enroll in this career track: Data Analyst with Power BI, plus SQL for Business Analysts.

The courses to do:

- Data-Driven Decision Making for Business (beginner — start here)
- Introduction to Power BI (beginner)
- Data Preparation in Power BI (intermediate)
- DAX Functions in Power BI (intermediate)
- Intermediate Data Modeling in Power BI (intermediate)
- Report Design in Power BI (intermediate)
- Analyzing Business Data in SQL (intermediate)
- Data-Driven Decision Making in SQL (intermediate)
- Data Communication Concepts (beginner)
- Introduction to Statistics in Google Sheets (beginner)
- Understanding Machine Learning (beginner)
- Introduction to AI for Work (beginner)
- Power BI Fundamentals
- Power BI Data Analyst (PL-300)

6. Data Analyst

Enroll in this career track: Associate Data Analyst in SQL, then Data Analyst with Python.

The courses to do:

- Introduction to SQL (beginner — start here)
- Intermediate SQL (intermediate)
- Joining Data in SQL (intermediate)
- Exploratory Data Analysis in SQL (intermediate)
- Reporting in SQL (intermediate)
- Introduction to Python (beginner)
- Data Manipulation with pandas (intermediate)
- Exploratory Data Analysis in Python (intermediate)
- Introduction to Data Visualization with Seaborn (intermediate)
- Introduction to Tableau (beginner)
- Analyzing Data in Tableau (intermediate)
- Creating Dashboards in Tableau (intermediate)
- Data Analysis in Excel (beginner)

Bonus skill tracks: SQL Fundamentals and Tableau Fundamentals

Certifications to pursue: Data Analyst, SQL Associate, and Tableau Certified Data Analyst

Finally, what if you want to continue to just get free certifications, then this is the list : Link

It provides all certifications that are being offered for free so you can pursue those.
