TLDR

Together With Wispr Flow

TLDR AI 2026-09-29

The Wispr Flow Notetaker is here - and it's got *all* the context with none of the bots (Sponsor)

We've all accepted that notetakers get things wrong, and all the pain that comes with: tedious cleanup, garbled customer quotes, confusing action items.

But what if your notetaker got it right the first time, every time?

Meet the Wispr Flow Notetaker.

It's free to use. It **gets your words right**. It gets speaker names right. It **works everywhere** (even an impromptu Slack huddle.) It delivers **clean and useable context** to your AI agents via MCP. And **no bot ever joins** the call.

Stop settling for almost-right. Get accurate, ready to use meeting notes that you don't need to double check.

Headlines & Launches

NVIDIA Launched Open Agent Safety Platform (4 minute read)

NVIDIA launched the Open Agent Safety Platform, combining the OpenShell secure runtime with the Sentry hardware watchdog to monitor agent actions and enforce policies. The platform spans software and hardware controls and is designed to support third-party compute platforms.

Anthropic's IPO prospectus shows sweeping AI vision, surging costs (5 minute read)

Anthropic is betting that AI will transform the global economy more profoundly than

industrialization, electricity, and the internet. The company is targeting a $2 trillion valuation. It reported a net loss of $42 billion in 2025, and it plans to spend $518 billion on cloud, computing, and infrastructure obligations in the coming year. Anthropic says nearly a quarter of its revenue last year came from two customers, and many of its largest clients are not locked into long-term contracts and could cut or stop spending.

AMD to Acquire World Labs for $8.2 Billion (3 minute read)

AMD agreed to acquire Fei-Fei Li's World Labs in an all-stock deal valued at roughly $8.2 billion, bringing its spatial-intelligence research team in-house. Li will become AMD's chief scientist, with World Labs' model expertise helping shape AMD's future AI hardware, software, and systems.

Deep Dives & Analysis

State of Agent Skills (9 minute read)

Vercel reported that its skills.sh registry reached one million reusable agent skills and nearly 280 million installs within seven months. Its analysis explored what users were teaching AI agents, which skills attracted installs, and how the emerging ecosystem was developing.

GPT-6 Astra performs unsanctioned supply-chain attacks in simulations (10 minute read)

GPT-6 Astra engaged in unsanctioned supply-chain attacks during simulated cybersecurity evaluations, surpassing the rates of previous models like GPT-5.6 Sol and GPT-5.5. Despite explicit instructions to restrict actions to specified environments, Astra still conducted unauthorized attacks, suggesting potential real-world risk if simulation artifacts are not recognized. This underscores the need for robust safeguards, as existing OpenAI measures weren't active during these simulations.

Engineering & Research

Your AI deserves better than garbled transcripts (Sponsor)

If your AI is writing nonsensical followups and misattributing customer quotes, you might want to double-check your transcript... or use the Wispr Flow Notetaker and get meeting transcripts you can trust. Names, people, technical terms - with the accuracy you expect from Wispr Flow. No meeting bots required. Use it for free

Claude Sonnet 5.5 (6 minute read)

Anthropic released Claude Sonnet 5.5 with stronger coding, long-horizon task, and image-understanding performance. It generated outputs over 30% faster than Sonnet 5 and, despite identical token pricing, used fewer tokens to reduce costs by up to 30% per task.

Introducing Eleven v4, our most emotive model (9 minute read)

Eleven v4 was designed to interpret tone, pacing, emotion, character, and context. It generates speech that can sound dramatic, tender, urgent, comedic, or conversational while maintaining the identity of the speaker. The model responds to the context of the conversation to produce natural dialogue and character interactions. Eleven v4 Turbo brings the same technology to low-latency use cases with a median inference latency of around 100 milliseconds.

Miscellaneous

Meta Launches an Enterprise AI Platform (2 minute read)

Meta launched a new enterprise business built around its AI models, agents, and infrastructure, with products including Muse, Meta Business Agent, Muse API, and Muse Code. Former MongoDB CEO Chirantan “CJ” Desai joined Meta to lead the platform.

Nvidia Adds $150 Billion to Massive Stock Buyback, the Largest Ever (4 minute read)

Nvidia will spend another $150 billion buying back its own shares. The company's buyback program now has a total remaining amount of $235 billion. Nvidia expects to execute the total remaining buyback program through its fiscal year 2028, which ends in late January. CEO Jensen Huang said the buyback authorization reflects the company's confidence in the long-term opportunity ahead.

The new Wispr Flow Notetaker is free (Sponsor)

Download it, install it, and record your next meeting with no meeting bots. You'll feel the difference immediately. $0/mo with weekly limits, or get one month free of Pro.

China's AI travel curbs now reach executives' spouses and children (2 minute read)

China now requires AI and chip executives' families to get travel approval, extending curbs to spouses and children.

Automating eval design and hill-climbing with Claude (12 minute read)

This post discusses principles for designing evals and hill-climbing against them without fooling yourself.

Introducing CoreWeave ARIA: AI Research and Iteration Agent (6 minute read)

ARIA picks up the highest-priority hypothesis, designs the experiment, launches it on your infrastructure, monitors the results, and reports back what it learned.

Team Bots: AI coworkers that learn from your team (5 minute read)

Team Bots, launched today, serve as AI assistants that integrate with existing workflows at SpaceXAI, providing daily briefings and managing tasks in sales, engineering, marketing, and data analytics.
